

Guest Instructor Spotlight

Rick Ellis will be a guest instructor at the "Go West" User Conference. Rick will be leading the Office Fundamentals class.

An Introduction to Rick Ellis

Rick Ellis has worked with and taught Civil/Survey CAD software since the mid-90s. He is the Author of several critically acclaimed books on AutoCAD Map 3D, Civil 3D and Carlson Software. He continues to work on projects in a production environment, in addition to teaching classes to organizations both large and small to help them get the most out of their software investment.

This practical background and approach has made him a highly rated speaker at Autodesk University, a member of the national speaker team for the AUGI CAD Camps and a sought after instructor by organizations around the world.

Carlson Software offers an extensive product line of desktop software solutions including Carlson Survey, Carlson Civil, Carlson Hydrology, Carlson Mining, Carlson Takeoff, Carlson Construction, and many more. While each of these applications has their own set of unique tools and functions, they also all share an extensive set of tools for setting up projects to store and organize project data, working with point data, working with digital terrain models, exchanging data with various other formats, as well as basic CAD drafting, editing and labeling functions. The mastery of these areas of commonality between all the Carlson desktop applications is the focus of this book. [More information about the book...](#)
