TruckPro

Carlson MACHINE CONTROL

GPS-Based Material Management Solution

TruckPro is the GPS-based assignment and tracking system for haul trucks. It enables supervisors and operators to know haul truck locations and material types during transit, even in low visibility conditions.

- Display cycle times
- Visualize load and dump locations
- Automated interface with manual capability
- Accurate tracking for improved planning
- Reporting across the network
- Haul Truck Speed Monitoring and Alerting

BREAK NEW GROUND

Carlson TruckPro

Real-Time Tracking

TruckPro is ideal for real-time tracking applications as supervisors can monitor haul truck locations. By knowing the truck locations, the supervisors can accurately assign trucks to digging equipment. This should equate to less idle time and more efficient haul truck routes.

Calculate Material Types and Tonnages

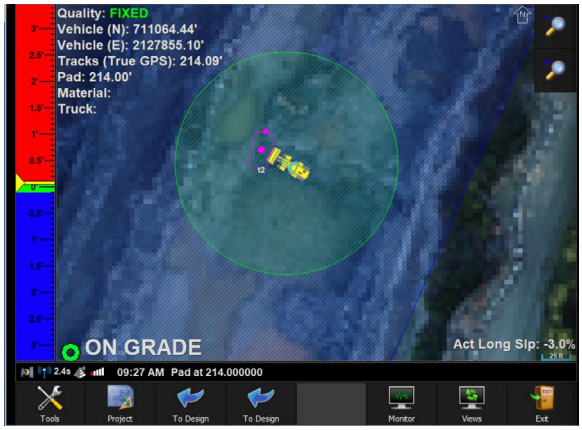

Using TruckPro, supervisors and engineers can gauge material types and tonnages hauled per load.
The operator can receive instant feedback from the in-cab tablet on their performance statistics, enabling them to visualize their goals and better perform.

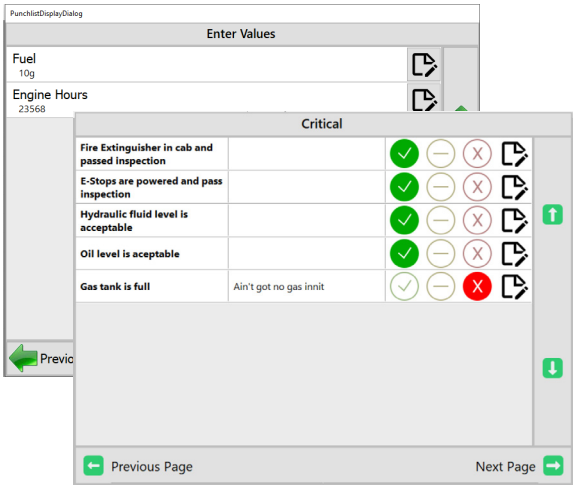

Features

- Monitor and record for reporting and analysis:
  - Load and dump locations
  - Material types
  - Machine production
  - Loader production
  - Operator production
- Pre-shift inspection check
- Customizable report generation using Carlson Command

Carlson Command's Live Interface

Carlson Command

Carlson Command allows supervisors to view activity in the field, in real-time. Supervisors can view single machines, multiple machines, or the entire site from the office. Command allows communication to and from the machines, tracks all assignments and collects all data for reporting and future analysis.

- Productivity analysis
- Data management of single or multiple sites
- Direct machine communication and data sharing with live and historical 3D machine playback
- File management & reporting
- Full cut/fill color map with real-time surface updates
- Create and customize tasks, delays and down codes
